LIFE WEEE PROJECT - ANDALUSIA

Waste Electrical and Electronic Equipment (WEEE): treasures to recover!

LIFE WEEE Project - LIFE16 GIE/IT/000645

Información a medida para decisiones eficientes

The constant evolution of the surrounding elements, and, in particular, of the role of Andalusian citizens, make it essential to take their opinions into consideration. Knowing the perceptions of our users is crucial to act accordingly.

ADHOKmerk2 knows that being aware of all elements which are decisive in the general knowledge of citizens will help the **Cámara de Comercio** improve the WEEE recycling planning in Andalusia.

This Report is based on the results of a research that we have carried out due to the interest in the degree of awareness of Andalusian citizens regarding the matter of Waste Electrical and Electronic Equipment (WEEE) recycling.

956 street surveys have been carried out over all Andalusian provinces. All respondents signed a form previously authorized by the **Cámara de Comercio**. The fieldwork required for this Report was carried out during the months of April-May, 2018.

ADHOKmerk2 analyzes in this Report the different dimensions of the service provided. Starting from the answers given by the respondents, a satisfaction analysis has been performed by using the Likert scale 1 to 5 as follows:

- 1- Totally disagree
- 2- Disagree
- 3- Agree
- 4- Very much agree
- 5- Totally agree

The questionnaire used in this study (Annex I) included three dimensions: **Knowledge of WEEE management, Awareness/participation in WEEE recycling, and Information about WEEE management/recycling**. This Report analyzes in detail the different items integrating these dimensions by displaying elements such as the **average perception according to all measured agents (province, age, gender and education)** or classifications of the **five best and worst rated items**.

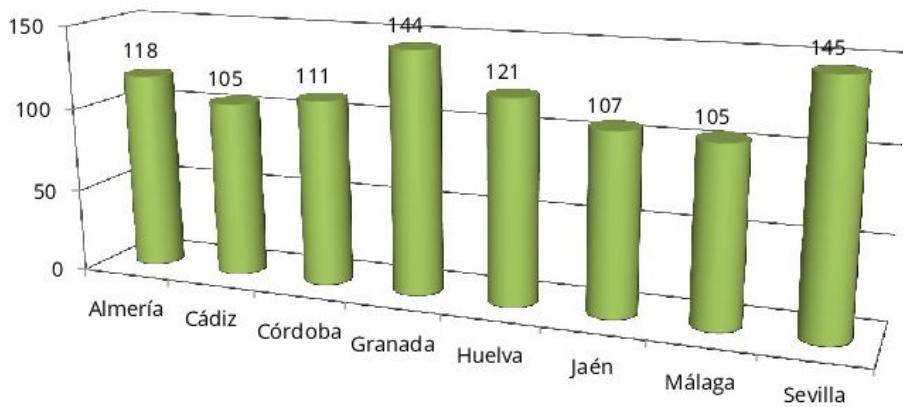

1. TOTAL SAMPLE

The questionnaire designed for the LIFE WEEE study in the region of Andalusia has received a total amount of 956 answers. The most answers were registered in the provinces of Seville (145) and Granada (144). Most respondents (244) belonged to the 35-44 age range. Regarding gender, more women (498) than men (458) filled in the questionnaire. Almost half of the respondents (462) have a university education, while those who only received primary education filled in 117 questionnaires.

3. RATINGS DISTRIBUTION

3.1 Ratings distribution

This chart shows the distribution of ratings (1-5) according to each of the dimensions included in the questionnaire (Annex I).

| | TOTAL RATINGS | | | | |
|--|---------------|------------|-------------|------------|-------------|
| | 1 | 2 | 3 | 4 | 5 |
| Knowledge of WEEE management | 2150 | 351 | 378 | 268 | 677 |

4. AVERAGES PER PROVINCE IN RELATION TO OTHER VARIABLES

4.1 All provinces

These charts show the relation among the Andalusian provinces and the other variables analyzed throughout the research. Almost anyone knows the meaning of the acronym WEEE, as it is the worst rated item (1.53 over 5.00). On the other hand, Andalusians consider it dangerous not to collect WEEE separately.

People between 26 and 34 years old would consider it useful if Municipalities applied a system of waste tariffs / taxes reduction for citizens who have delivered old WEEE directly to municipal collection centres or other registered collection points.

People between 45 and 55 years old (2.79) are those most aware of the issue of WEEE recycling, while people over 55 years old are the least aware (2.60).

Men (2.69) and women (2.67) are equally informed about WEEE recycling.

The more educational background, the more knowledge of WEEE recycling, as can be seen in the figures for university-educated people (2.82) and people who only have primary education (2.24).

4.2 Almería

These charts show the relation between the province of Almería and the other variables analyzed throughout the research. This is the Andalusian province with the highest degree of information about WEEE recycling. People from Almería would consider it useful if Municipalities applied a system of waste tariffs / taxes reduction for citizens who have delivered old WEEE directly to municipal collection centres or other registered points. However, they are not familiar with the legislation that allows them to freely return small WEEE.

People between 26 and 34 years old would consider it useful if Municipalities applied a system of waste tariffs / taxes reduction for citizens who have delivered old WEEE directly to municipal collection centres or other registered points.

People between 45 and 55 years old (3.14) are those most aware of the issue of WEEE recycling, while people under 25 years old are the least aware (2.81).

Women (3.13) are more informed than men (2.80).

Just like in the case of the overall average, the more educational background, the more knowledge of WEEE recycling, as can be seen in the figures for university-educated people (3.26) and people who only have primary education (2.21).

4.3 Cádiz

These charts show the relation between the province of Cádiz and the other variables analyzed throughout the research. This is the Andalusian province with the lowest degree of information about WEEE recycling. People from Cádiz would consider it useful if Municipalities applied a system of waste tariffs / taxes reduction for citizens who have delivered old WEEE directly to municipal collection centres or other registered points. However, they are not familiar with the meaning of the acronym WEEE.

Younger people, those under 25 years old, would consider it useful to have a smartphone app.

Younger people (under 25 years old) are more informed about WEEE recycling (2.19). Older people (over 55 years old) are the least informed (1.42).

Men (1.78) and women (1.85) are equally informed about WEEE recycling.

University-educated people (2.16) are more informed about recycling. People with primary education (1.33) are the least informed about recycling.

4.4 Córdoba

These charts show the relation between the province of Córdoba and the other variables analyzed throughout the study. People from Córdoba consider it dangerous not to collect WEEE separately and they don't know the meaning of the acronym WEEE.

People between 45 and 55 years old consider it dangerous not to collect WEEE separately.

People between 35 and 44 years old (3.08) are the most aware of WEEE recycling, while people under 25 years old (2.73) are the least aware.

Men (2.93) and women (2.84) are equally informed about WEEE recycling.

Those with primary education (3.03) are more informed, while the least informed are those with secondary education (2.75).

4.5 Granada

These charts show the relation between the province of Granada and the other variables analyzed throughout the study. People from Granada consider it dangerous not collect WEEE separately and they don't know the meaning of the acronym WEEE.

People between 45 and 55 years old would consider it useful to have a smartphone app including information on this topic.

Younger people (2.91) are the most aware of WEEE recycling, while people between 26 and 34 years old are the least aware (2.54).

Men (2.88) are slightly more informed than women (2.71).

The more educational background, the more knowledge of WEEE recycling, as can be seen in the figures for university-educated people (2.85) and people who only have primary education (2.47).

4.9 Seville

These charts show the relation between the province of Seville and the other variables analyzed throughout the study. People from Seville consider it dangerous not to collect WEEE separately. However, they are not familiar with Real Decreto 110/2015, which allows them to freely return small WEEE (under 25 cm).

People between 26 and 34 years old would consider it useful if Municipalities applied a system of waste tariffs / taxes reduction for citizens who have delivered old WEEE directly to municipal collection centres or other registered points.

People between 26 and 34 years old (2.91) are the most aware of WEEE recycling, while people between 35 and 44 years old (2.45) are the least aware.

Men (2.63) and women (2.66) are equally informed about WEEE recycling.

People with secondary education (2.80) are the most informed about WEEE recycling, while university-educated people are the least informed (2.62).

5. AVERAGES BY AGE IN RELATION TO OTHER VARIABLES

5.1 All ages

These charts show the relation between the age ranges and the other variables analyzed throughout the research. Almost anyone knows the meaning of the acronym WEEE, as it is the worst rated item (1.53 over 5.00). On the other hand, Andalusians consider it dangerous not to collect WEEE separately.

People from Huelva consider it dangerous not to collect WEEE separately.

People from Almería (2.95) are those most aware of the issue of WEEE recycling, while people from Cádiz are the least aware (1.82). Men (2.69) and women (2.67) are equally informed about WEEE recycling.

The more educational background, the more knowledge of WEEE recycling, as can be seen in the figures for university-educated people (2.82) and people who only have primary education (2.24).

5.5 45-55 years

These charts show the relation between the “45-55 years” age range and the other variables analyzed throughout the research. Almost anyone knows the meaning of the acronym WEEE, as it is the worst rated item (1.70 over 5.00). In addition, people who are between 45 and 55 years old consider it dangerous not to collect WEEE separately.

People between 45 and 55 years old from Huelva consider it dangerous not to collect WEEE separately.

People from Jaén (3.28) are those most aware of the issue of WEEE recycling, while people from Cádiz are the least aware (1.69).

Women (2.73) are slightly less informed than men (2.85).

The more educational background, the more knowledge of WEEE recycling, as can be seen in the figures for university-educated people (3.06) and people who only have primary education (2.33).

6.3 Men

These charts show the relation between the male gender and the other variables analyzed throughout the study. Almost anyone knows the meaning of the acronym WEEE, as it is the worst rated item (1.52 over 5.00). On the other hand, Andalusian men consider it dangerous not to collect WEEE separately.

Men from Huelva would consider it useful if Municipalities applied a system of waste tariffs / taxes reduction for citizens who have delivered old WEEE directly to municipal collection centres or other registered points.

Men from Córdoba (2.93) are those most aware of the issue of WEEE recycling, while men from Cádiz are the least aware (1.78).

Men between 45 and 55 years old (2.85) are more informed about WEEE recycling, while men between 35 and 44 years old (2.54) are the least informed.

The more educational background, the more knowledge of WEEE recycling, as can be seen in the figures for university-educated men (2.84) and men who only have primary education (2.24).

7.4 High school degree

These charts show the relation between the “high school degree” level and the other variables analyzed throughout the study. Almost anyone knows the meaning of the acronym WEEE, as it is the worst rated item (1.37 over 5.00). On the other hand, Andalusians consider it dangerous not to collect WEEE separately.

People from Huelva consider it dangerous not to collect WEEE separately.

People from Almería and Córdoba (2.89) are those most aware of the issue of WEEE recycling, while people from Cádiz are the least aware (1.65).

People over 55 years old (3.00) are more informed about WEEE recycling, while people between 35 and 44 years old (2.42) are the least informed.

Men (2.71) and women (2.66) are equally informed about WEEE recycling.

9. CONCLUSIONS AND SUGGESTIONS

After carrying out surveys all over Andalusia, we can confirm that the degree of awareness of Andalusians with regards to the recycling of Waste Electrical and Electronic Equipment (WEEE) is quite low.

The most aware city is Almería, followed by Córdoba and Granada. Cádiz is the least aware Andalusian city in what concerns WEEE.

Regarding age ranges, people between 45 and 55 years old are the most aware, while people over 55 years old are the least aware of WEEE.

Concerning education, the more educational background, the more knowledge and awareness of WEEE recycling among Andalusian citizens.

Out of all 956 respondents, most neither know the meaning of the acronym WEEE nor are familiar with the existence of a website (<https://raeeandalucia.es/>) containing relevant information on the topic.

It should also be noted that Andalusians are never informed at appliances stores about the new legislation or about the advantages of returning their WEEE at the stores so that they recycle them in an adequate way.

What Andalusians do consider is that:

- A. It is dangerous not to collect separately.
- B. It would be useful if Municipalities applied a system of waste tariffs / taxes reduction for citizens who have delivered old WEEE directly to municipal collection centres or other registered points.
- C. It would be useful to have a smartphone app including a map and useful information on the closest WEEE collection points.

Relying on these conclusions, we think that, in order to improve the perceptions of WEEE among Andalusians, the **Cámara de Comercio** should:

1. Carry out an information and awareness campaign through:
 - a) Online and offline, regional and local media (press, radio, TV...).
 - b) Malls/Shops/EEE stores.
 - c) Events at schools, high schools or universities, either public or private.
 - d) Webpages and social media of public institutions.
 - e) Associations and companies related to the environment.
2. Create a smartphone app including a map and useful information on the closest WEEE collection points.
3. Credit citizens that deliver WEEE directly to municipal collection centres or other registered points.
